

PRECIOUS METAL

Precious metals deposition

PRECIOUS METAL > Precious metals deposition

Codex International offers a wide range of precious metals in the form of pellets, rods, foils, wires, tubes...or profiled sputtering targets for optimized use. All precious metals are recyclable by us.

	Max Purity available	Melting point	Density	Main alloys available	Recyclability - Percentage Yield for 99.99%
Gold (Au)	6N	1 064.18°C	19.32 g/cm ³	AuPd, AuCo,AuAg,AuZn...	99.9%
Platinum (Pt)	6N	1 768°C	21.37 g/cm ³	PtCu,PtNi,PtRh,PtPd...	99.9%
Iridium (Ir)	5N	2 446°C	22.56 g/cm ³	IrMn	98%
Rhodium (Rh)	5N	1 963°C	12.44 g/cm ³		97%
Palladium (Pd)	5N	1 555°C	12.16 g/cm ³	PdNi, PdAu,PtPd...	99.5%
Ruthenium (Ru)	5N	2 250°C	12.06 g/cm ³		97%
Silver (Ag)	6N	961.78°C	10.50 g/cm ³	AgAu, AgSi, AgNi, AgGe...	99.7%

Precious Metal Recycling Service

Codex International offers a comprehensive precious metal recycling service from recovery to remanufacturing into new products.

Spent sputtering targets or precious metal scrap follow a state-of-the-art process of recycling and regeneration and the resulting credit will be transfer to your weight account.

This credit can be used directly for a replacement of target and/or precious metal item or the funds can be used to purchase other Codex International's products and/or services.
